PROFESSIONAL SUMMARY

B.Tech Computer Science graduate (2026) with hands-on experience in Python, SQL and front-end web development, plus academic projects in machine learning and neural networks. Completed four virtual internships in web, front-end and full stack development. Strong in debugging, troubleshooting and problem solving, with clear communication skills. Seeking an entry-level IT role such as Software Developer, Full Stack Developer, Application Support Engineer or Data / ML Associate.

TECHNICAL SKILLS

Programming: Python, C
Web Technologies: HTML5, CSS3, JavaScript, Bootstrap, React.js
Databases: SQL, PL/SQL, Oracle
AI / Data: Machine Learning (classification), Deep Learning, Neural Networks, Data Preprocessing
Tools: Git, GitHub, VS Code, MS Excel
Core Strengths: Debugging, Troubleshooting, Issue Analysis, Problem Solving, Team Collaboration

INTERNSHIP & TRAINING

Full Stack Web Development Intern – Future Interns Aug 2026 – Sep 2026
- Completed a structured, task-based 1-month internship, applying full stack concepts to practical assignments.
- Delivered tasks within project timelines and improved technical understanding by acting on mentor feedback.

Frontend Development Intern – DecodeLabs (Virtual Internship) Aug 30, 2026 – Sep 30, 2026
- Completed the DecodeLabs Virtual Internship Program, working on real-world projects and collaborative tasks that built hands-on problem-solving skills.

Frontend Development Intern – CodeAlpha (Virtual Internship) Sep 1, 2026 – Sep 30, 2026
- Completed the CodeAlpha Virtual Internship Program in Frontend Development, recognized for dedication and sincerity.

Web Development Intern – SkillCraft Technology Sep 1, 2026 – Sep 30, 2026
- Completed a 1-month Web Development internship, building practical web development skills through assigned tasks.

Young Professional – TCS iON Career Edge
- Completed professional readiness training in workplace communication, business etiquette and employability skills.

PROJECTS

Employee Attrition Rate Prediction | Python, Machine Learning Academic Project
- Built a classification model to identify employees likely to leave an organization.
- Performed data preprocessing, feature engineering, model training and evaluation.

Fake Profile Detection on Social Networks | Python, Neural Networks Academic Project
- Developed a neural network model to detect fake profiles by analyzing user behavior and profile features, improving classification accuracy.

To-Do List Web Application | HTML5, CSS3, JavaScript
- Implemented task creation, priority, due dates, search, theme switching and dynamic task management.
- Tested and debugged the application to improve reliability. GitHub

Personal Portfolio Website | HTML5, CSS3, JavaScript, Bootstrap 5
- Built a responsive portfolio site showcasing skills, projects and professional information. GitHub

Calculator | HTML5, CSS3, JavaScript
- Built a responsive calculator with core mathematical operations and interactive input. GitHub

EDUCATION

B.Tech, Computer Science and Engineering – Malla Reddy Institute of Engineering and Technology 2023 – 2026
CGPA: 6.90 / 10

Diploma – Sri Rajarajeshwara Swamy Polytechnic College, Sircilla 2020 – 2023
CGPA: 6.01 / 10

SSC – TMRS Boys School, Ramagudam 2019 – 2020
CGPA: 8.8 / 10

LANGUAGES

English, Telugu, Hindi, Urdu
